

NOTE: CREM = Council for Regulatory Environmental Modeling.

The announcement for a CREM Post Doc position just went live today.  
Please feel free to forward to anyone who may be interested.  
The deadline for submitting an application is: April 24, 2009

EPA's Office of the Science Advisor (OSA) periodically seeks qualified individuals to fill positions in our post-doctoral program. The Office of the Science (OSA) provides leadership in cross-Agency science policy development. OSA's mission is to ensure that the highest quality science is integrated into Agency policies and decisions. The OSA accomplishes this through five functionalities: The Science Policy Council (SPC) Staff, the Risk Assessment Forum (RAF), the Human Studies Review Program, the Environmental Technology Staff, and Earth Observations Systems (including the Council for Regulatory Environmental Modeling-CREM, Forum on Environmental Measurement, and Global Earth Observing Systems of Systems-GEOSS).

. . .

We are seeking a highly motivated individual to provide expertise and leadership in the CREM's efforts to help ensure that the Agency's model-based decisions are founded on the best available, practicable science and are legally defensible. Candidates should have experience developing and applying environmental models and should be broadly familiar with a variety of statistical methods for sensitivity and uncertainty analysis. In addition, an interest in IT and technology used to support the development of environmental models is desirable.
